

Practical AI

This badge is a recognition of skills and knowledge in the field of artificial intelligence as well as the completion of the Practical AI course.

After accomplishing this course, the student has practical knowledge on artificial intelligence as well as related fundamental terminology and principles.

Upon earning the badge, the student has demonstrated their expertise in the field by completing practical exercises and processing various subjects across the aforementioned topics.

The scope of the course is two European study credits (2 ECTS).

This badge has been granted by the course developers, namely Microsoft, Kajaani University of Applied Sciences, and mentor companies.

Criteria

This badge can be earned by successfully completing the Practical AI course. Completing the course successfully requires the passage of all the exercises.

The course is organized by Microsoft, Kajaani University of Sciences, and mentor companies.

The course includes contents about AI as a creator of texts and pictures, AI in everyday life, and the ethical questions related to AI. In the course, students can learn about the responsible and safe use of artificial intelligence.

The course consists of multimodal theoretical content and practical exercises. The course can be completed independently on the [Edukamu study platform](#) developed by Kajaani University of Applied Sciences.

More information about the course can be found on the [course website](#).
